                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 12, Application US/10359012

Sequence 12, Application No. US20030232419A1

GENERAL INFORMATION

APPLICANT: THE JOHNS HOPKINS UNIVERSITY SCHOOL OF MEDICINE

APPLICANT: TERMAN, John R.

APPLICANT: TERMAN, John R.

APPLICANT: PASTERKAMP, Ronald J.

APPLICANT: WOLODKIN, Alex L.

APPLICANT: WAO, Tianyi

APPLICANT: WAD METHODS OF USING THE SAME

TITLE OF INVENTION: MOLECULES INTERACTING WITH CASL (MICAL) POLYNUCLEOTIDES, POLYPEPT

TITLE OF INVENTION: MOLECULES INTERACTING THE SAME

FILE REFERENCE: JHU1840-3

CURRENT APPLICATION NUMBER: US 60/388,325

FRIOR APPLICATION NUMBER: US 60/384,302

PRIOR PELING DATE: 2002-05-30

PRIOR APPLICATION NUMBER: US 60/384,302
